

An Introduction to Categories with Haskell and Databases

Ryan Holbrook

April 9, 2019

Outline

Introduction

A simple slide

This slide consists of some text with a number of bullet points:

- ▶ the first, very @important@, point!
- ▶ the previous point shows the use of the special markup which translates to the Beamer specific *alert* command for highlighting text.

The above list could be numbered or any other type of list and may include sub-lists.
